

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the abstract as follows:

~~The invention discloses a~~ A ~~method and system of teleservice interworking of~~  
broadband heterogeneous networks is disclosed. ~~Said~~ The heterogeneous networks  
are connected by a call control equipment and a media interworking equipment, ~~said~~  
The call control equipment ~~is used for signaling interworking and controlling the call that~~  
~~spans networks, said media interworking equipment is used for mapping the media port~~  
~~that spans networks and transmitting media streaming under the control of said call~~  
~~control equipment, said method comprising: receiving~~ receives a call request coming  
from a caller party equipment ~~by the call control equipment; and determines~~ determining  
~~by the call control equipment whether the call request of the caller party equipment is a~~  
call that spans the heterogeneous networks, ~~if said~~ If the call request is a call that  
spans the heterogeneous networks, then ~~under the control of the call control equipment,~~  
~~creating connections~~ a connection between the media interworking equipment and the  
caller party equipment and a connection between the media interworking equipment  
and a called party equipment are created under the control of the call control  
equipment; ~~and transmitting~~ Then, the media interworking equipment transmits the  
media streaming, ~~by the media interworking equipment and realizing~~ thus the media  
interworking can be realized.
